Date: JULY 06, 2017

Subject: RECOMMENDATION: SPJ 908-17-4 ESRI SOFTWARE

I have reviewed your statement of justification as it relates to your June 14, 2017 email in which you state the City currently uses ESRI ArcGIS Enterprise System for Geospatial Information systems in Utility District, Public Work, Police, Fire and Community Development. Additionally, you stated this software integrates with the ESRI GIS System used by Palm Beach County in which the City receives updates and data associated with map layering data for the City of Riviera Beach.

This purchase will entail the procuring of ESRI Enterprise Software as a propriety purchase as several of the City's departments as well as the County are currently using this software package.

The Purchasing department searched several governmental agencies in hope of piggybacking the purchase. However, the contract available with the Federal Government under GSA, unfortunately does not allow non-federal agencies to piggyback.

Accordingly, the Purchasing Department recommends approval of ESRI ArcGIS Enterprise System for Geospatial Information Systems as a propriety purchases.
