Re: Emergency Repair – Force Main and Gravity Sewer Replacement –  
East Industrial Way and Central Industrial Drive

Dear Mr. Walker,

This proposal is for the emergency repair at East Industrial Way and Central Industrial Drive where an existing 8" ACP force main has failed. It was determined after discussion with the City of Riviera Beach Utility Department that the scope for the emergency repair is as follows; Installation of approximately 1,400 LF of 8" C-900 force main including 100 LF 10" horizontal directional drilled HDPE (HDD) across Central Industrial Drive. Additionally, due to location, existing utilities, and deteriorating VCP gravity sewer main approx. 700 LF of 8 in gravity sewer main will be replaced and (1) cut in Manhole 8-12 ft deep. The proposal includes removal, abandonment, and asbestos abatement of the existing mains to be replaced under this scope of work. All restoration associated with impacted areas to like or better condition are included in this proposal. The price includes a mill and overlay of approximately 1200 SY that may not be needed if reconstruction occurs and would result in a reduction of approx. \$60,000. The work is intended to be performed on a time and material basis and the proposal of \$580,000.00 is not to exceed unless the scope of work varies from described herein.

Please contact me at 561-718-4531 with any questions you may have regarding our proposal and thank you for the opportunity.

Sincerely,

Wm. Clark C. Cryer

Special Conditions:

The above proposal excludes all bonds, any permits required, water usage, and meter deposit.
