MEMORANDUM

TO: Honorable Chair and Members, CRA Board of Commissioners
City of Riviera Beach, Florida

FROM: Scott Evans, Interim Executive Director, CRA

COPY: J. Michael Haygood, CRA Attorney

DATE: February 12, 2020

SUBJECT: Requesting Approval for Acquisition of City Owned Property for Purposes of Supplemental Parking

REQUEST FOR ACTION

The RBCRA Staff is requesting approval to purchase the City-owned property located at E 28th Street, Parcel No# 56434228170000030, Legal Description LEE-WOOD PARK LT 3 for the appraised price of $60,000 as seen on Attachment A, for the purposes of constructing a parking lot. This lot is to provide additional parking for the RBCRA owned property located at 2600 Broadway.

BACKGROUND

In November of 2018, the Agency acquired the building located at 2600 Broadway as approved in the FY 2018/2019 Budget by the CRA Board of Commissioners. The proposed plan is to complete a total redevelopment of the building, house several retail spaces on the ground floor and office spaces on the second floor.

The building is currently 25,412sf; the current City Code (as seen in Attachment C), calls for one parking space for every 300sf of space. The building has roughly 49 spaces and securing the aforementioned property will enable us to minimize the current deficiency.

CURRENT STATUS

The proposed property for acquisition is located at E 28th just one block north of the CRA-owned building at 2600 Broadway in the heart of the CRA District as seen in Attachment A. The less than a quarter acre of vacant land was purchased by the City back in April of 1994 and is currently sandwiched between two developed parcels. The plan is to construct an offsite parking lot that will accommodate 11 additional spaces as seen in Attachment B.

RECCOMENDATTION

Staff recommends approval of the acquisition of the City-owned property located at E 28th Street by the Agency, for purposes of providing additional parking to support the redevelopment of the CRA-owned property located at 2600 Broadway.

Mr. Scott Evans, AICP
Executive Director
Riviera Beach Community Redevelopment Agency
2001 Broadway, Suite 300
Riviera Beach, FL 33404

Dear Mr. Evans, AICP:

Pursuant to your request, we have personally appraised the real property being a single parcel containing 5,868 square feet, or 0.1347 acres, of vacant, commercial land. The subject property is located approximately 500 feet north of Blue Heron Boulevard, 130 feet east of Broadway on the first interior lot on the north side of East 28th Street. The property does not have a formal address.

The purpose of this narrative appraisal is to estimate the market value of the fee simple estate of the subject property as of July 26, 2019. The intended use of the report is to assist the client and intended user in asset valuation. This report has been prepared for no other purpose and for use by no other person or entity than for use by the client for the purpose stated herein. Any other use of this appraisal is considered a misuse and thus the appraisers will not be held responsible for any outcome associated with use by another entity or for another purpose.

Mr. Scott Evans, AICP
Page 2
August 1, 2019

We have utilized the sales comparison approach to value, the most common method used for valuing properties such as the subject property.

As a result of our analysis, we have developed an opinion that the market value of the fee simple estate (as defined in the report), subject to the definitions, certifications, and limiting conditions set forth in the attached report, as of July 26, 2019 was:

MARKET VALUE: **$60,000**

The following presents our analysis and conclusions in a narrative appraisal report. This letter must remain attached to the report, which contains 55 pages plus related exhibits, in order for the value opinion set forth to be considered valid. Your attention is directed to the General Limiting Conditions contained within this report.

Respectfully submitted,

ANDERSON & CARR, INC.

CERTIFICATION

I certify that, to the best of my knowledge and belief:

The statements of fact contained in this report are true and correct.

The reported analyses, opinions, and conclusions are limited only by the reported general limiting conditions, and are my personal, impartial, and unbiased professional analyses, opinions, conclusions, and recommendations.

I have performed no services, as an appraiser or in any other capacity, regarding the property that is the subject of this report within the three year period immediately preceding acceptance of this assignment.

I have no present or prospective interest in the property that is the subject of this report, and I have no personal interest with respect to the parties involved.

I have no bias with respect to any property that is the subject of this report or to the parties involved with this assignment.

My engagement in this assignment was not contingent upon developing or reporting predetermined results. This appraisal assignment was not based on a requested minimum valuation, a specific valuation, or the approval of a loan.

My compensation for completing this assignment is not contingent upon the development or reporting of a predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of this appraisal.

The reported analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the requirements of the Code of Professional Ethics & Standards of Professional Appraisal Practice of the Appraisal Institute, which include the Uniform Standards of Professional Appraisal Practice.

The use of this report is subject to the requirements of the Appraisal Institute relating to review by its duly authorized representatives.

Amy Reid has made a personal inspection of the property that is the subject of this report. Robert B. Banting, MAI, SRA has made a personal inspection of the property that is the subject of this report.

As of the date of this report, Robert B. Banting, MAI, SRA has completed the continuing education program of the Appraisal Institute.

No one provided significant real property appraisal or appraisal consulting assistance to the person signing this certification.

Robert B. Banting, MAI, SRA

GENERAL LIMITING CONDITIONS

1. Unless otherwise stated, the value appearing in this appraisal represents our opinion of the market value or the value defined as of the date specified. Values of real estate are affected by national and local economic conditions and consequently will vary with future changes in such conditions.

2. Possession of this report or any copy thereof does not carry with it the right of publication nor may it be used for other than its intended use. The physical report(s) remains the property of the appraiser for the use of the client. The fee being charged is for the analytical services only. The report may not be copied or used for any purpose by any person or corporation other than the client or the party to whom it is addressed, without the written consent of an officer of the appraisal firm of Anderson & Carr, Inc. and then only in its entirety.

3. Neither all nor any part of the contents of this report shall be conveyed to the public through advertising, public relations efforts, news, sales or other media without written consent and approval of an officer of Anderson & Carr, Inc. nor may any reference be made in such public communication to the Appraisal Institute or the MAI, SRA or SRPA designations.

4. The appraiser may not divulge the material contents of the report, analytical findings or conclusions, or give a copy of the report to anyone other than the client or his designee, as specified in writing except as may be required by the Appraisal Institute, as they may request in confidence for ethics enforcement or by a court of law or body with the power of subpoena.

5. Liability of Anderson & Carr, Inc. and its employees is limited to the fee collected for the appraisal. There is no accountability or liability to any third party.

6. It is assumed that there are no hidden or unapparent conditions of the property, sub-soil, or structures which make it more or less valuable. The appraiser assumes no responsibility for such conditions or the engineering which might be required to discover these facts.

7. This appraisal is to be used only in its entirety. All conclusions and opinions concerning the analysis which are set forth in the report were prepared by the appraisers whose signatures appear on the appraisal report. No change of any item in the report shall be made by anyone other than the appraiser and the appraiser and firm shall have no responsibility if any such unauthorized change is made.

8. No responsibility is assumed for the legal description provided or other matters legal in character or nature, or matters of survey, nor of any architectural, structural, mechanical, or engineering in nature. No opinion is rendered as to the title which is presumed to be good and merchantable. The property is valued as if free and clear of any and all liens and encumbrances and under responsible ownership and competent property management unless otherwise stated in particular parts of the report.

9. No responsibility is assumed for accuracy of information furnished by or from others, the clients, their designee, or public records. We are not liable for such information or the work of subcontractors. The comparable data relied upon in this report has been confirmed with one or more parties familiar with the transaction or from affidavit when possible. All are considered appropriate for inclusion to the best of our knowledge and belief.

10. The contract for appraisal, consultation or analytical service is fulfilled and the total fee payable upon completion of the report. The appraiser or those assisting the preparation of the report will not be asked or required to give testimony in court or hearing because of having made the appraisal in full or in part; nor engaged in post-appraisal consultation with client or third parties, except under separate and special arrangement and at an additional fee.

11. The sketches and maps in this report are included to assist the reader and are not necessarily to scale. Various photos, if any, are included for the same purpose and are not intended to represent the property in other than actual status as of the date of the photos.

12. Unless otherwise stated in this report, the appraisers have no reason to believe that there may be hazardous materials stored and used at the property. The appraiser, however, is not qualified to detect such substances. The presence of substances such as asbestos, urea-formaldehyde foam insulation or other potentially hazardous materials may affect the value of the property. The value estimate is predicated on the assumption that there is no such material on or in the property that would cause a loss in value. No responsibility is assumed for any such conditions or for any expertise or engineering knowledge required to discover them. The client is urged to retain an expert in this field, if desired.

13. If applicable, the distribution of the total valuation of this report between land and improvements applies only under the existing program of utilization. The separate valuations for land and building must not be used in conjunction with any other appraisal, no matter how similar and are invalid if so used.

14. No environmental or impact studies, special market studies or analysis, highest and best use analysis study or feasibility study has been requested or made unless otherwise specified in an agreement for services or in the report. Anderson & Carr, Inc. reserves the unlimited right to alter, amend, revise or rescind any of the statements, findings, opinions, values, estimates or conclusions upon any previous or subsequent study or analysis becoming known to the appraiser.

15. It is assumed that the property is in full compliance with all applicable federal, state, and local environmental regulations and laws unless the lack of compliance is stated, described, and considered in this appraisal report.

16. The value estimated in this appraisal report is gross without consideration given to any encumbrance, lien, restriction, or question of title, unless specifically defined. The estimate of value in the appraisal report is not based in whole or in part upon the race, color, or national origin of the present owners or occupants of the properties in the vicinity of the property appraised.

17. It is assumed that the property conforms to all applicable zoning, use regulations, and restrictions unless a nonconformity has been identified, described, and considered in this appraisal report.

18. It is assumed that all required licenses, certificates of occupancy, consents, and other legislative or administrative authority from any local, state, or national government or private entity or organization have been or can be obtained or renewed for any use on which the opinion of value contained in this report is based.

19. It is assumed that the use of the land and improvements is confined within the boundaries or property lines of the property described and that there is no encroachment or trespass unless noted in the report.

20. This appraisal report has been prepared for the exclusive benefit of the client and intended users, Riviera Beach Community Redevelopment Agency. This report has been prepared for no other purpose and for use by no other person or entity than for use by the client for the purpose stated herein. Any other use of this appraisal is considered a misuse and thus the appraisers will not be held responsible for any outcome associated with use by another entity or for another purpose.

21. ACCEPTANCE OF, AND/OR USE OF THIS APPRAISAL REPORT CONSTITUTES ACCEPTANCE OF THE PRECEDING CONDITIONS.

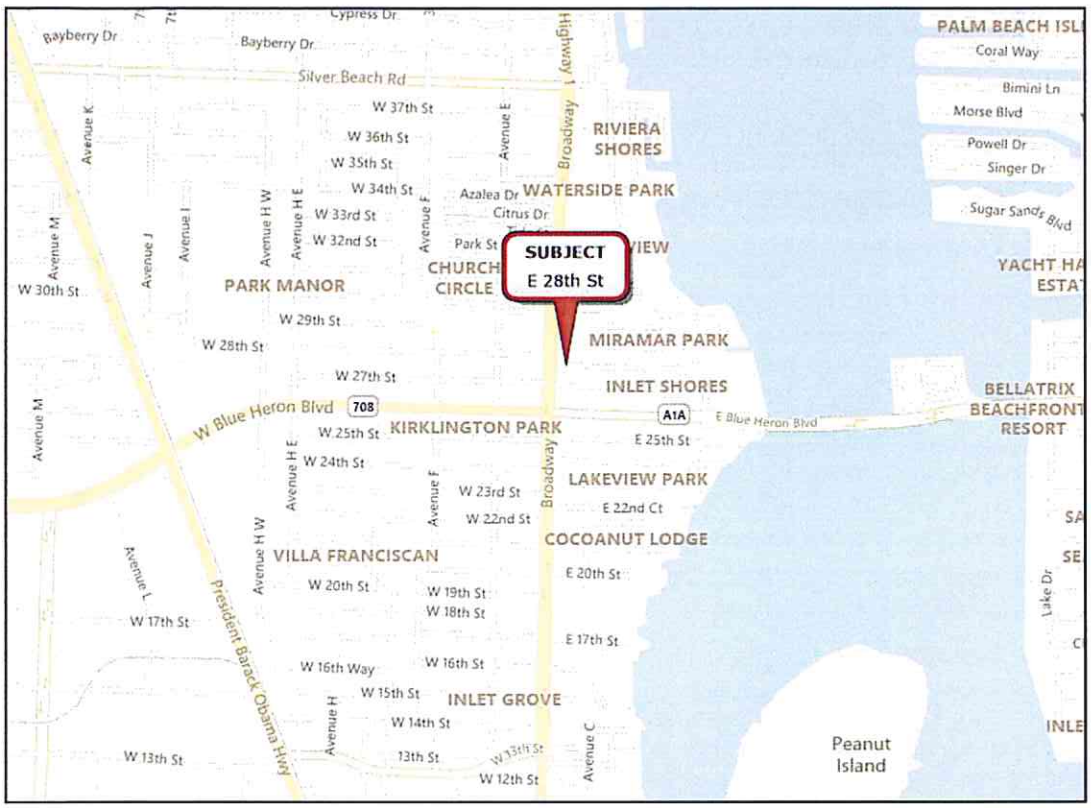

EXTRAORDINARY ASSUMPTIONS

No Extraordinary Assumptions were utilized in the preparation of this appraisal.

PURPOSE AND DATE OF VALUE

The purpose of this appraisal is to estimate the market value, fee simple estate, of the subject property as of July 26, 2019.

PROPERTY APPRAISED

The subject property consists of 0.14 acres located approximately 500 feet north of Blue Heron Boulevard, 130 feet east of Broadway and is the first interior lot on the north side of East 28th Street.. The subject is zoned DC - Downtown Core by City of Riviera Beach.

LEGAL DESCRIPTION

The legal description for the subject property was taken from the most recent deed for the subject property, recorded in OR Book 8260, Page 1305.

Lot 3, LEE-WOOD PARK, AN ADDITION to the Town of Riviera Beach, Florida, according to the Plat thereof recorded in the Office of the Clerk of the Circuit Court in and for Palm Beach County, Florida, in Plat Book 20, Page 94.

DISCLOSURE OF COMPETENCY

Per the Competency Rule contained within the Uniform Standards of Professional Appraisal Practice, the appraisers hereby affirm that they are competent to complete the appraisal assignment for which they have been engaged by the client.

INTENDED USE AND USER

The intended use of this report is to assist the client and intended user in asset valuation. The intended user of the report is Riviera Beach Community Redevelopment Agency.

This report has been prepared utilizing generally accepted appraisal guidelines, techniques, and methodologies as contained within the Uniform Standard of Professional Practice (USPAP), as promulgated by the Appraisal Foundation.

This appraisal report has been prepared in a manner believed to be consistent with the guidelines contained in Title XI of the Financial Institution Reform Recovery and Enforcement Act of 1989 (FIRREA).

CLIENT

Mr. Scott Evans, AICP
Executive Director
Riviera Beach Community Redevelopment Agency
2001 Broadway, Suite 300
Riviera Beach, FL 33404

DEFINITIONS

Market Value

The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently, knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: (1) Buyer and seller are typically motivated; (2) Both parties are well informed or well advised, and acting in what they consider their own best interests; (3) A reasonable time is allowed for exposure in the open market; (4) Payment is made in terms of cash in U. S. dollars or in terms of financial arrangements comparable thereto; and (5) The price represents normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale. (Title XI of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (FIRREA) and the Interagency Appraisal and Evaluation Guidelines, Federal Register, Volume 75, No. 237, December 10, 2010).

PROPERTY RIGHTS APPRAISED

The property rights appraised are those of the fee simple estate.

Fee simple estate is defined as absolute ownership unencumbered by any other interest or estate, subject only to the limitations imposed by the governmental powers of taxation, eminent domain, police power, and escheat (The Dictionary of Real Estate Appraisal, 6th ed., Chicago: Appraisal Institute, 2015).

TYPICAL BUYER PROFILE

The typical purchaser of the subject would be either a developer who would develop the site for lease or resale or an owner/user that would develop the site for his own use. The comparables utilized in the sales comparison approach to value reflect these trends.

SCOPE OF ASSIGNMENT

The traditional appraisal approaches include the cost approach, the sales comparison approach, and the income capitalization approach. We have considered all three approaches in this assignment, and determined the sales comparison approach to be applicable in this assignment.

The cost and income capitalization approaches are not applicable in the valuation of land.

In the process of gathering data for the sales comparison approach to value, we conducted a search of our appraisal files and public information sources such as the Palm Beach County Property Appraiser's public access system and the Palm Beach County Clerk's Office, as well as subscription based information services such as CoStar.com for comparable sales in the relevant market area. We searched for the most similar sales to the subject property.

The sales ultimately selected for further analysis were the best comparable sales we were able to find in this market. We obtained and verified additional information on the comparable properties with a party to the transaction, or a broker or agent of the parties when possible.

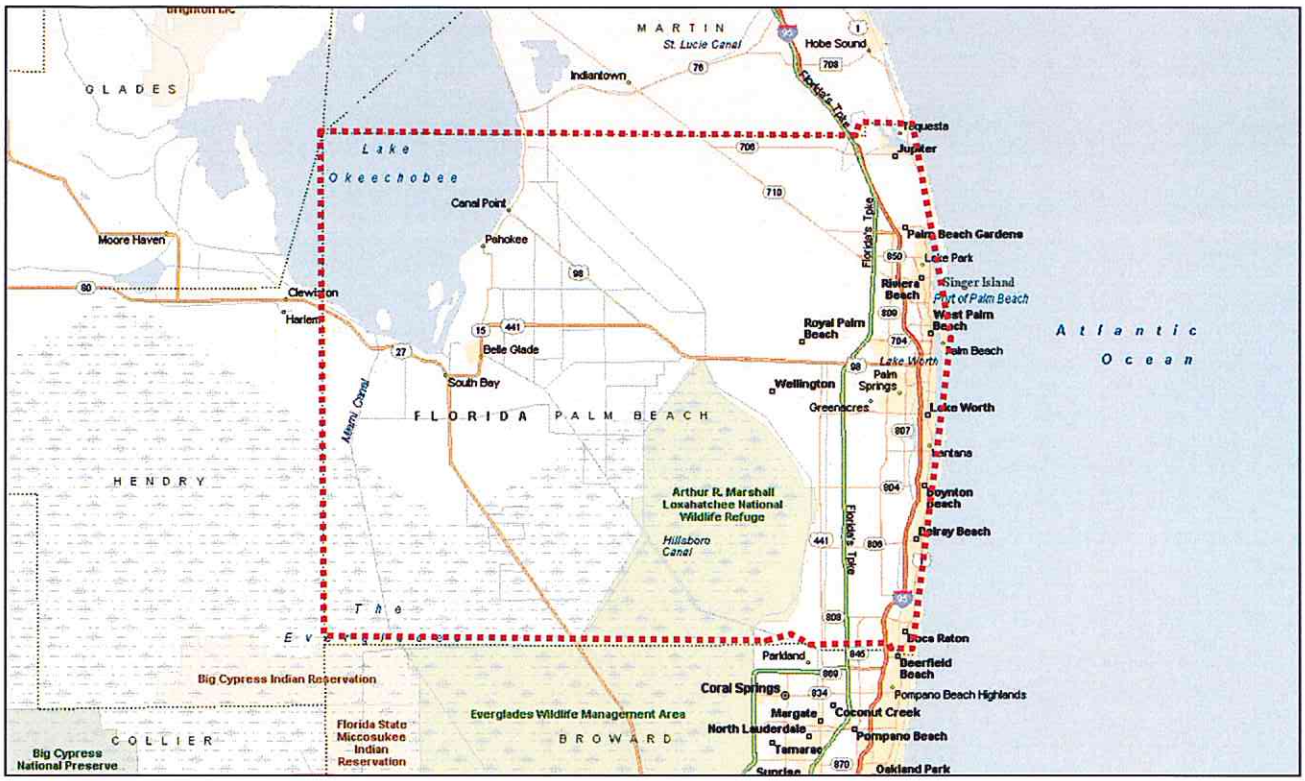

We inspected the exterior of the subject property and the comparables. Physical data pertaining to the subject property was obtained from an inspection of the premises and public information sources such as the Palm Beach County Property Appraiser's records. Other data pertaining to the subject property was obtained from the Palm Beach County Clerk's and Tax Collector's offices and local planning and zoning departments.

The product of our research and analysis is formulated within this report for analysis of and direct comparison with the subject property being appraised. Additionally, we have used original research performed in preparation of other appraisals by this office, which is considered appropriate for the subject property.

We make no warranty as to the authenticity and reliability of representations made by those with whom we verified sales, rental, and other information. We have taken due care in attempting to verify the data utilized in this analysis. We based our analysis and conclusions on overall patterns rather than on specific representations.

Per USPAP Standard Rule 2-2 this analysis is an Appraisal Report presented in written format. The analysis and conclusions of this appraisal assignment are presented in a narrative appraisal report.

PALM BEACH COUNTY SUMMARY

Geography

Palm Beach County is located along Florida's Southeast coast. It is bordered by Martin County to the north, Hendry and Glades Counties to the west, Broward County to the south and the Atlantic Ocean to the east. The northwestern portion of the county is made up of Lake Okeechobee, the largest freshwater lake in Florida. The county is located approximately 80 miles north of Miami and 260 miles south of Jacksonville.

Palm Beach County encompasses approximately 2,203 square miles with roughly 1,974 square miles of land area, 229 square miles of water, and 47 miles of coastline. According to the U.S. Census Bureau's 2015 estimate, Palm Beach County has a population of 1,422,789; an increase of 7.8 percent from the 2010 census statistics of 1,320,134. The vast majority of the county's growth has been a result of in-migration from the northern states as well as from Miami-Dade and Broward Counties to the south. Palm Beach County ranks as the third most populous county in Florida behind Miami-Dade and Broward Counties.

The county includes 38 incorporated municipalities; the largest of which is West Palm Beach, the county seat. Boca Raton, located at the south end of the county, is the second largest city and one of the highest income retail trade areas in the United States.

Miami-Dade, Broward and Palm Beach Counties are known as the "Gold Coast". This area is approximately 110 miles from north to south, but only 20 miles wide at its widest points. This is the second longest urbanized area in the United States, just behind the New York Metropolitan area.

Transportation

Vehicular Travel

Interstate 95 is a major north/south thoroughfare that connects Palm Beach County to the southeastern and northeastern portions of the state, and then continues along the Eastern Seaboard to Maine. Florida's Turnpike also passes through the county and provides connections to Miami-Dade and Broward Counties to the south and Orlando to the north, connecting with I-75 around Leesburg, FL. Other north/south highways include A1A, U.S. Highway 1, Congress Avenue, Military Trail and U.S. 441. A1A connects the coastal communities along the eastern edge of the county while U.S. 441 connects the more western communities such as Wellington and Jupiter Farms. There are numerous local east/west roadways with Southern Boulevard and Blue Heron Boulevard providing access to the most western portions of the county including Belle Glade, as well as Florida's West Coast.

Airport

Palm Beach International Airport (PBI) is centrally located 2.5 miles from downtown West Palm Beach and adjacent to I-95 providing air service for communities throughout Palm Beach County. PBI opened in 1988 and has expanded over the past 30 years. There are currently fourteen major airlines operating with numerous domestic flights and international flights to the Bahamas and Canada. The airport's growth necessitated a direct access overpass interchange with I-95 which significantly improved ingress and egress for the airport. Palm Beach County is also home to four commercial executive airports.

Rail Service and Transit

There are two main rail corridors in Palm Beach County, the Florida East Coast railway and CSX railway, partially owned by the Florida Department of Transportation to run the Tri-Rail commuter trains. AmTrak is a passenger train than runs throughout the county connecting passengers to other parts of the country. Brightline, the express intercity high-speed rail system runs service between Miami and West Palm Beach with a single intermediate stop in Ft. Lauderdale. It began service in May 2018, with an extension from West Palm Beach to Orlando via Melbourne planned to open in late 2021. Palm Tran is Palm Beach County's public transportation provider for fixed route passenger bus service. It also operates Palm Tran CONNECTION and provides paratransit services for qualified users. Local municipalities and Tri-rail provide various trolley and shuttle services throughout Palm Beach County.

Port of Palm Beach and Intracoastal Waterway

The Port of Palm Beach is located in Riviera Beach, FL and is an independent taxing authority district with a five member Board of Commissioners. It has an annual cargo tonnage of 5.1 and passenger traffic of 550,000. It is the fourth busiest container port of Florida's 14 deepwater ports and 18th in the United States. Unlike most ports in the US, the Port of Palm Beach is an export port, with approximately 80% of its cargo being exported. The majority of the cargo goes to support the island nations of the Caribbean, supplying 60% of everything consumed in the Bahamas. It is home to Bahamas Paradise Cruise Line offering two day cruises to Grand Bahama Island. The Intracoastal Waterway represents one of Palm Beach County's most identifiable marine destinations. Roughly 43 miles of waterway serve as a regional connector between 23 of the county's municipalities.

Economy

The unemployment rate in Palm Beach County reached a peak of 12 percent in July 2010. As of March 2019, the unemployment rate was 3.4 percent with a net annual change of -0.3 percent according to the U.S. Bureau of Labor Statistics. Tourism is the county's leading industry, employing over 70,000 people and generating about two billion dollars annually. The other multi-billion dollar industries are construction and agriculture. All three industries experienced some decline due to economic conditions from 2007 until the middle of 2011. The economy began to stabilize in mid-2011 and these industries have continued to experience signs of recovery into 2019.

Palm Beach County's favorable economic profile is partially defined by its biotech sector; however, a growing educational sector has emerged to enhance the economic base. Colleges and universities in the county include Palm Beach State College, two Florida Atlantic University campuses, Palm Beach Atlantic University, and Lynn University.

The largest employer in Palm Beach County is the Palm Beach County School Board, the tenth largest school district in the United States, with over 22,000 employees and a $3 billion dollar budget for the 2018-2019 school year. Palm Beach County employment by industry is shown in the following table.

PALM BEACH EMPLOYMENT BY INDUSTRY IN THOUSANDS

	Current Jobs		Current Growth		10 Yr Historical		5 Yr Forecast

LQ = Location Quotient

Commercial Real Estate

Industrial

Leasing- The vacancy rate for Palm Beach County has always tracked below the national average and is close to all-time lows which can be attributed to modest construction and strong net absorption over the cycle.

Rent- Rent growth has been stable over the last year and is currently at 4.9%. The most expensive properties tend to center around Boca Raton in the south end of the county and Palm Beach Gardens/Jupiter in the north. Rent growth should continue to maintain a healthy rate in the near term.

Construction- Construction has picked up in recent years and new supply is expected to increase moderately over the next few years with 530,000 SF still under construction.

Sales- Investors have taken an active interest in industrial space and sales volume has increased quickly in the cycle. Sales volume in 2018 was somewhat subdued compared to prior years, but 2019 is off to a good start.

Overview

Palm Beach Industrial

12 Mo Deliveries in SF	12 Mo Net Absorption in SF	Vacancy Rate	12 Mo Rent Growth
386 K	65.8 K	3.2%	4.9%

Strong household growth across Palm Beach has fueled the demand for logistics space. Vacancies are close to all-time lows, the result of years of solid absorption and just modest construction. Despite tight vacancies that are below the national average, rent growth has been below the national average for most of the cycle. Palm Beach County has also become a more popular metro for investment in the past few years, and pricing has surpassed $120/SF.

KEY INDICATORS

Current Quarter	RBA	Vacancy Rate	Market Rent	Availability Rate	Net Absorption SF	Deliveries SF	Under Construction

Sales Volume	$375 M	$169.8M	N/A	$397.3M	2019 Q1	$35.6M	2010 Q1

Office

Leasing- The vacancy decline in Palm Beach County has been one of the most dramatic in Florida this cycle. In fact, vacancy compression here has ranked among the best metros nationally.

Rent- At nearly $32 per SF, office rents are higher in Palm Beach County than other Florida markets outside of Miami. Rent growth has been solid and remains above the national average.

Construction- Deliveries have been sparse in this cycle and less than 100,000 SF delivered in 2018. Construction activity has picked up and the North and South Towers in North Palm Beach will bring about 224,000 SF to the market.

Sales- Investment has picked up considerably across the metro specifically in the Boca Raton and Delray submarkets as investors attempt to capitalize on the improving economy and healthy fundamentals.

Overview

Palm Beach Office

12 Mo Deliveries in SF	12 Mo Net Absorption in SF	Vacancy Rate	12 Mo Rent Growth
364 K	(22.4 K)	10.2%	5.1%

For the majority of the cycle, Palm Beach has had strong and consistent demand, and a relatively low level of construction over the cycle has limited supply-side pressure. Office-using employment growth continues to be a driving force behind the economic improvement across the metro, concentrated in the business hubs of Boca Raton and West Palm Beach. Consequently, landlords have been able to push rents, and rent growth has been outperforming the national average.

Sales Volume	$652 M	$590.9M	N/A	$1.3B	2015 Q2	$101.6M	2009 Q4

Retail

Leasing- Palm Beach County remains one of the top metros in the National Index for population growth, combined with median household growth above the national median, should translate into increased retail spending that will continue to support long-term demand.

Rent- Rent growth has been slow but is in line with the national average. The Palm Beach submarket, which encompasses most of the coastal retail property, has the highest retail asking rents in the metro at over $60/SF, indicating an enormous premium for retail space on or near the beach.

Construction- Palm Beach has historically been active in retail development, but this cycle has been much more moderate, adding less than 400,000 SF last year. Development is forecast to uptick slightly over the next few years.

Sales- Sales activity and pricing continues to fall. While overall pricing in 2018 averaged less that $200/SF, the highest prices are generated in the urban core of Palm Beach with a few sales surpassing $1,000/SF.

Overview

Palm Beach Retail

12 Mo Deliveries in SF	12 Mo Net Absorption in SF	Vacancy Rate	12 Mo Rent Growth
497 K	87.3 K	4.6%	1.4%

Palm Beach has traditionally been an attractive retail market due to strong demographics. And employment growth has been concentrated in higher-income jobs, which should help spur median household income growth in conjunction with the rising population of wealthy retirees. Landlords have capitalized on these factors by raising rents. Retail space is slightly more expensive in Palm Beach than in Fort Lauderdale, but rents are significantly less than Miami's. Fundamentals have been performing well, and retail vacancies are down in Palm Beach and across all of South Florida.

Multi-Family

Vacancy- Strong demand has allowed vacancies to compress below the historical average. The metro is forecast to grow at one of the fastest rates in the country.

Rent- Palm Beach continues to experience some of the strongest rent growths in SF. The affluence of this metro may help maintain higher rents despite supply-side pressure. Recently the best rent growth has been in Boca Raton and Delray, two of the metro's most expensive submarkets.

Construction- Palm Beach has been one of the fastest growing metros in the country this cycle, growing by about 30%. Development reached a cyclical high in 2018 when 2,600 units came on line.

Sales- Investors seeking quality assets are making moves in Palm Beach with over $1 billion in annual transactions over the past three years. Average pricing is now close to $210,000/unit.

Overview

Palm Beach Multi-Family

12 Mo. Delivered Units	12 Mo. Absorption Units	Vacancy Rate	12 Mo. Asking Rent Growth
1,604	**2,504**	**6.6%**	**2.9%**

Strong employment and population trends have enticed developers to be quite active in Palm Beach, with apartment inventory increasing by almost 30% this cycle. Although 2018 was one of the heaviest years in the metro's history for supply additions, strong demand has allowed vacancies to compress. Another wave of construction is set to hit the market in the near term, but healthy economic indicators should keep vacancies near the historical average. Rent growth continues to improve and is projected to stay strong in 2019. Investors are flooding into this high-growth market, with sales surpassing $1 billion each year since 2016.

Conclusion

Some of the factors that fed Palm Beach County's past growth diminished in 2007 with a decline in the national economy which included reduced home prices and high unemployment. This trend continued until the middle of 2011 when signs of stabilization began to emerge. In the fourth quarter 2011, sales activity began to show signs of recovery. A slow but steady rebound in the market has continued into the first quarter of 2019.

Unemployment rates have steadily decreased and home prices are trending upward. The market is experiencing a steady climb from the depths of the recession which has spurred investors into action. The long-term outlook for Palm Beach County is considered positive due to the broad employment base and desirability as a winter tourist destination. As population grows, more supporting commercial, industrial, and service development will be required. These factors, combined with a finite quantity of developable land create a positive real estate outlook for the future.

NEIGHBORHOOD SUMMARY

The subject property is located in an area of Palm Beach County, in the town of Riviera Beach. The general neighborhood is residential with older single-family homes, condominium projects and duplex type units in well-established neighborhoods. Commercial and retail uses can be found on the major east/west and north/south roadways through this area. The neighborhood is bounded by Silver Beach Road to the north, the Intracoastal Waterway to the east, Blue Heron Boulevard to the south and Broadway/US Highway 1 to the west.

Blue Heron Boulevard has an interchange with Interstate 95, and also provides access to a barrier island known as Singer Island to the east. Access characteristics are considered good. The primary north-south arteries through the neighborhood is Broadway, also known as US Highway 1. The area is more or less fully developed with a mixture of commercial, retail, and residential uses.

The general area is known for being within close proximity to Singer Island, as well as several newer strip malls with trendy dining and shopping establishments. Additionally, the area contains several marinas with popular dining and entertainment establishments. Singer Island has been a popular tourist destination for decades and the Blue Heron Bridge is one of two bridges which provide access to the barrier island.

Inventory Analysis	Prior 7-12 Months 7/30/2018 - 1/29/2019	Prior 4-6 Months 1/30/2019 - 4/29/2019	Current - 3 Months 4/30/2019 - 7/30/2019
Total # of Comparable Sales (Settled)	9	6	5
Absorption Rate (Total Sales/Months)	1.50	2.00	1.67
Total # of Active Listings	10 (Active on 1/29/2019)	10 (Active on 4/29/2019)	13 (Active on 7/30/2019)
Months of Housing Supply (Total Listings / Ab. Rate)	6.67	5	7.78
Median Sale & list Price, Dom, Sale/List %	**Prior 7-12 Months**	**Prior 4-6 Months**	**Current - 3 Months**
Median Comparable Sale Price	260,000	358,750	295,000
Median Comparable Sales DOM	93	156	83
Median Comparable List Price	431,500	369,850	382,900
Median Comparable Listings DOM	233.5	163	84
Median Sale Price as % of List Price	94.00 %	95.00 %	97.00 %

As illustrated in the chart above, median sales prices for single family dwellings in the neighborhood have remained stable over the prior twelve months, days on the market have remained stable and the percentage of the final sales prices expressed as a percentage of the asking price has also increased. All of these factors are indications that the subject is located in an improving market and demand has remained strong for this type of inventory.

Overall, the general locale is a desirable residential location based on proximity to Singer Island and the built-out nature of the area. It is centrally located with good access to I-95, and is within close proximity to a beach and other dining and shopping establishments. Like most of the county, property values in the area had seen significant declines through the end of the prior decade. However, the declines appear to have moderated since the end of 2010 and it appears that trends are now building positive momentum. Saving another downturn in the economy both shorter- and longer-term value trends are expected to be positive.

PROPERTY DATA

Taxpayer of Record

City of Riviera Beach

Palm Beach County Property Control Number(s)

56-43-42-28-17-000-0030

Assessed Value and Taxes for 2017

The following information was taken from the Palm Beach County Property Appraiser's and Tax Collector's web sites.

Appraisals		
Improvements $0	Land $39,140	Total Value $39,140
Assessed and Taxable Values		
Assessed Value $39,140	Exemption $0	Taxable Value $39,140
Taxes		
Ad Valorem $0	Non Ad Valorem $0	Total Tax $0

A typical informed buyer would recognize the possibility of a reassessment following a sale of the property and the possibility that taxes could change as a result, if the assessed value is substantially different than the true market value.

That said, considering the market value conclusion contained herein, the subject appears to be fairly assessed.

Our value conclusion does not discount for any taxes owed on the property, current or delinquent. The value assumes the property is free and clear and not subject to any prior year's delinquencies or outstanding tax certificates. The appraisers strongly suggest any potential buyer, mortgagee, or other investor in the property fully investigate the tax status of the subject property with the County's Tax Collectors office.

Census Tract

The subject property is located in census tract 12.00.

Census Tract Map

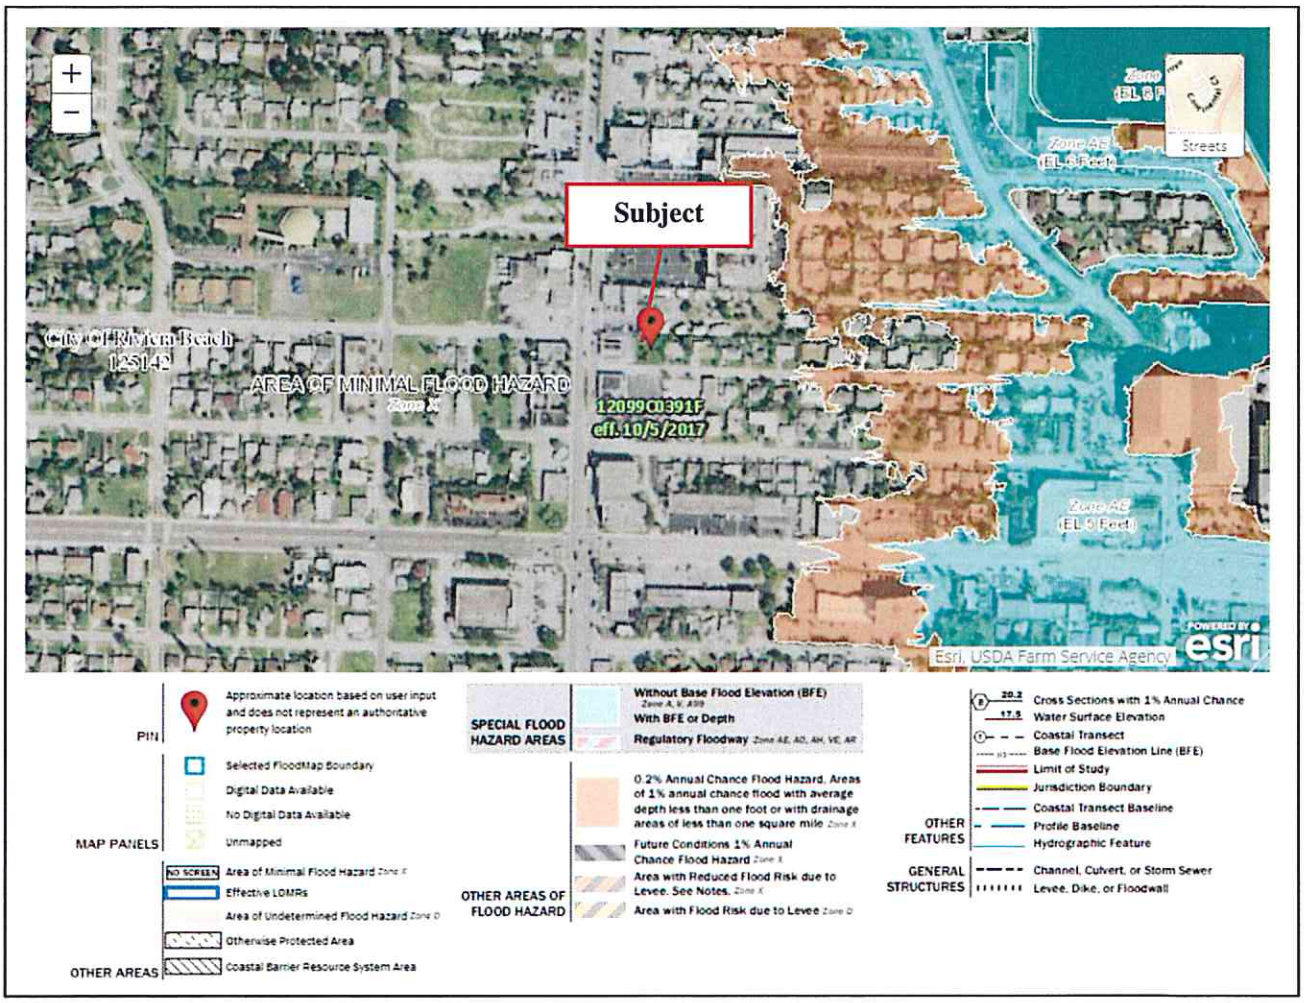

Flood Zone Designation

The subject property is located on the National Flood Insurance Program Map on Community Panel Number 12099C0391F, effective date of October 5, 2017. The subject appears to lie in an area designated as Zone X (unshaded).

Flood Zone X (unshaded) is determined to be outside the 0.2% annual chance floodplain.

Flood Map

Zoning and Future Land Use

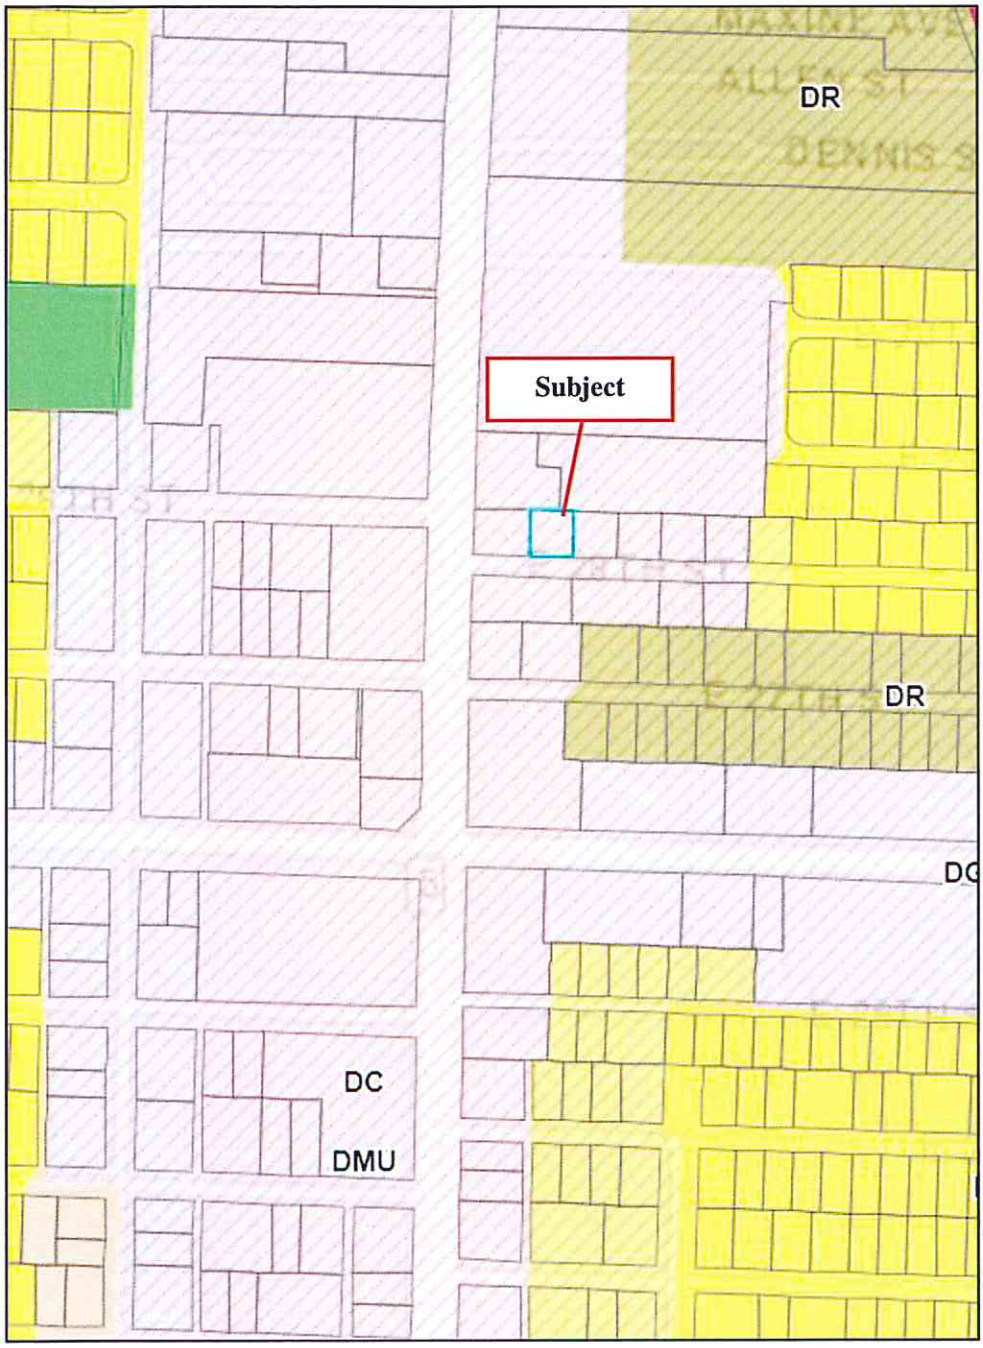

The subject property's use is dictated by the City of Riviera Beach Zoning Code and Comprehensive Plan. The City of Riviera Beach zoning and future land use maps indicate the subject property has a zoning designation of DC - Downtown Core with an underlying land use designation of C - Commercial.

Permitted uses under this zoning category generally include, but are not limited to: residential, office, retail and commercial uses. The subject's current use as vacant land is in line with the current zoning as an interim permitted use and the current zoning is in harmony with the future land use designation.

The subject is located within a local Community Redevelopment Area, which has led to recent zoning changes. Most of the property within the study area will be assigned either Downtown Core or Downtown General; both are mixed use districts allowing residential, office, retail, and commercial uses. Downtown Core is the more intense district, allowing the widest range of uses in buildings up to eight stories tall. Downtown General is intended to provide a neighborhood main street character and accommodates a mix of uses in buildings up to three stories tall.

The combination of five downtown zoning districts with new street designations ensures compatibility. Each street is designated as Primary or Secondary, which provides an organizing framework for development. Primary streets are intended to develop as the main pedestrian routes and most prominent streets in the City. As such, primary streets are held to higher building standards. Buildings are oriented facing primary streets while parking and service uses are organized along secondary streets, when possible. This system ensures the efforts of multiple property owners and developers work together in a predictable manner that contributes to overall vision for the area. The subject is located on a secondary street.

Zoning Map

Concurrency

The strongest growth control measure ever imposed was passed by the Florida Legislature and became effective on February 1, 1990. This was mandated by Chapter 163, Florida Statutes, otherwise known as the Growth Management Law. One provision of this law is referred to as Concurrency which dramatically limits the ability to develop real property. It is basically the requirement that adequate infrastructure be available to serve new development. Eight types of infrastructure are affected including traffic, potable water, sewer, drainage, solid waste, recreation and open space, mass transit, and fire rescue.

In May of 2011, House Bill 7172 amended the Growth Management act in an effort to spur economic growth through streamlining and lessening growth management controls. Transportation concurrency requirements were exempted in dense urban land areas with populations of at least 1,000 people per square mile. Also, within dense urban land areas, the DRI process has been exempted. State review of local comprehensive plans was streamlined and zoning changes are now allowed to be considered concurrently with land use plan amendments.

It is the appraisers' understanding that the subject is not subject to any concurrency restrictions. Should the property be altered or redeveloped, the matter of concurrency would need to be revisited at that time.

Utilities

The following utilities are available to the subject property: municipal water and sewer, electricity, and telephone.

Subject Property Sales History

The appraisers have not been provided with a title abstract on the property appraised nor have they conducted a title search of their own. The Palm Beach County Property Appraiser's records indicate that the subject property last sold on April 1, 1994 for a price of $100. This sale was recorded in Palm Beach County OR Book and Page 8260/1305.

To the appraisers' knowledge the subject property is not currently listed for sale or subject to a current purchase agreement.

Site Analysis

The following analysis is based upon a personal inspection of the site and Palm Beach County Public Records.

Location

The subject property is located approximately 500 feet north of Blue Heron Boulevard, 130 feet east of Broadway on the first interior lot on the north side of East 28th Street. The property is known as East 28th Street, Riviera Beach, Florida 33404, but does not have a formal address.

Size and Shape

We have relied on the site size for the property from the Palm Beach County Property Appraiser's records. The site is a square shaped parcel of land having roughly 75 feet of frontage along the north side of East 28th Street, a two-lane, paved, public road. The subject site area is approximately 5,868 square feet or 0.135 acres.

Topography and Drainage

The site is level and near road grade. The subject property is level and near road grade. Drainage appears to be adequate.

Access

Access is via a curb cut and median break from southbound Broadway (US Highway 1) and direct access from northbound Broadway onto East 28th Street, a two-lane, paved, public surface street.

Easements or Encroachments

Typical utility easements are believed to exist. A survey that would delineate the boundaries of any potentially detrimental easements or encroachments was not made available to the appraisers. The appraisers did not note any such conditions during our on-site inspection, nor did the property owner disclose any. We have no reason to believe that there are any easements or encroachments on the property that would affect its use in such a way as to have a negative impact on value.

Soil/Environmental Conditions

We have not been provided with nor have we commissioned a soil or sub-soil condition report. The subject's land appears to be composed of typical loose South Florida sand.

The appraisers have no reason to believe that there may be hazardous materials stored and used at the property. The appraiser, however, is not qualified to detect such substances. The presence of substances such as asbestos, urea-formaldehyde foam insulation or other potentially hazardous materials may affect the value of the property. The value estimate is predicated on the assumption that there is no such material on or in the property that would cause a loss in value. No responsibility is assumed for any such conditions, or for any expertise or engineering knowledge required to discover them. The client is urged to retain an expert in this field, if desired.

HIGHEST AND BEST USE

The Appraisal Institute defines highest and best use as follows:

The reasonably probable and legal use of vacant land or an improved property that is physically possible, appropriately supported, financially feasible, and that results in the highest value. The four criteria the highest and best use must meet are legal permissibility, physical possibility, financial feasibility, and maximum productivity. Alternatively, the probable use of land or improved property—specific with respect to the user and timing of the use—that is adequately supported and results in the highest present value. (Source: Appraisal Institute, The Dictionary of Real Estate Appraisal, 6th ed., Chicago: Appraisal Institute, 2015).

The analysis of highest and best use normally applies these considerations in a three step process, involving the analysis of the highest and best use of the site as if vacant, determination of the ideal improvement, and a comparison of the existing improvement with the ideal improvement, in order to estimate the highest and best use as improved. The subject is vacant land, therefore only the first two steps apply.

The subject site contains roughly 5,868 square feet, or 0.135 acres and could physically support a number of uses. These physically possible uses must be legal, reasonable, probable, and a logical continuation of surrounding uses within the subject property's neighborhood. The subject is currently zoned DC - Downtown Core for C - Commercial use. The surrounding area has been developed mainly with commercial and residential uses in the past.

In consideration of the site's location, land use classification, zoning and surrounding uses, the highest and best use for the subject, as if vacant, would be development with some type of service use to serve the neighboring higher intensity uses on primary streets in keeping with the zoning, land use, and neighborhood uses.

EXPOSURE AND MARKETING TIME

Exposure time is: 1) The time a property remains on the market; 2) The estimated length of time the property interest being appraised would have been offered on the market prior to the hypothetical consummation of a sale at market value on the effective date of the appraisal; 3) A retrospective estimate based on an analysis of past events assuming a competitive and open market.

Marketing time is an opinion of the amount of time it might take to sell a real or personal property interest at the concluded market value level during the period immediately after the effective date of an appraisal. Marketing time differs from exposure time, which is always presumed to precede the effective date of an appraisal. Advisory Opinion 7 of the Appraisal Standards Board of The Appraisal Foundation and Statement on Appraisal Standards No. 6, Reasonable Exposure Time in Real Property and Personal Property Market Value Opinions address the determination of reasonable exposure and marketing time. (Source: Appraisal Institute, The Dictionary of Real Estate Appraisal, 6th ed., Chicago: Appraisal Institute, 2015).

Financing for commercial properties appears to be readily available at this time. Most properties offered for sale have been exposed on the market for six to twelve months or longer.

The CoStar Group reported the historical marketing times (exposure time) for vacant land properties in the subject's market area within the prior twelve months. The marketing time ranged from 112 days to 824 days, with an average of twelve months. We note that the Costar data can be skewed by many properties that were significantly overpriced by unmotivated sellers and/or were not properly marketed and languished on the market for several years. We believe if appropriately priced and marketed, the subject would sell in the median portion of the time frame range exhibited by the CoStar data.

Considering the preceding, as well as sales that have taken place in the local market, and assuming a prudent pricing strategy, we estimate an exposure time of six to eighteen months. Looking forward, we feel this would be a reasonable estimate for marketing time as well.

SALES COMPARISON APPROACH

The sales comparison approach is the process of deriving a value indication for the subject property by comparing market information for similar properties with the property being appraised, identifying appropriate units of comparison, and making qualitative comparisons with or quantitative adjustments to the sale prices (or unit prices, as appropriate) of the comparable properties based on relevant, market-derived elements of comparison. (Appraisal Institute, The Dictionary of Real Estate Appraisal, 6th ed., Chicago: Appraisal Institute, 2015.)

The sales comparison approach requires that the appraiser locate recent sales of similar properties and through an adjustment process arrive at an indication of what these properties would have sold for if they possessed all of the salient characteristics of the subject property. These adjusted sales prices are then correlated into an estimate of the market value of the property via the sales comparison approach to value.

A search of the Palm Beach County official records, local multiple listing service records, discussions with local brokers and appraisers and a personal inspection of the subject area produced several sales of similar type properties. The sales used in the analysis were the best comparables that we were able to verify with public records and/or a party to the transaction.

The following pages feature a detailed write up of each comparable used in the analysis, a location map and summary of the selected comparable sales data, which is followed by a discussion of the pertinent adjustments and conclusion of value.

Comments:

Buyer owns the adjacent boat sales and repair facility to the east fronting Broadway. Property was purchased for expansion. The seller is related to Viking Yachts who had purchased the property as a speculative investment in 2006, at which time it was improved with a single-family home. At that time Viking was assembling property in the area with the anticipation of a large-scale redevelopment project in the area. The redevelopment failed to materialize and the buyer approached the seller about purchasing the property.

Comments:

This is the sale of a vacant tract of land that the seller has marketed for a number of years. Most recently it was listed in 2015 for $169,900 but did not sell. This sale took place after listing the property for $175,000. The tract is located between an auto parts store and a small medical office with the county mental health facility across the street. It was purchased for investment purposes with the broker stating that the buyer may eventually develop the site with a fast food restaurant.

Comments:

This is the sale of a vacant commercial parcel situated on Broadway in West Palm Beach. The property was previously developed with a small commercial building. Although none of the parties involved in this transaction could be reached to comment on the sale, at the time of the write up, the property is was listed for lease on a net basis at $0.20/SF of land per month, or $2,000/month. The owner will also build to suit. This property was originally listed for $139,900 which was reduced to $119,000 prior to selling after 143 days on the market.

SALE NO. 4 - Westgate Avenue, West Palm Beach, FL 33409

Comments:

This vacant lot was listed for $35,000 and sold after 7 days on the market. It was purchased by the adjoining vacant landowner for assemblage / investment. The buyer is a local plumber whose shop is on Westgate Avenue and who owns other properties in the area. The broker stated the listing generated several interested parties and that the sale took place after a lower offer fell through. The adjoining 11,508 square foot lot was acquired in January 2018 for $4.69 per square foot.

SALE NO. 5 - 2551 Westgate Avenue, West Palm Beach, FL 33409

Sales Summary and Discussion

In this analysis, we considered differences between the sales and the subject in terms of property rights sold, conditions of sale, financing, market conditions (trend or time adjustment), location, land size, and quality and condition of any existing improvements.

The appraisers based the comparisons on a standardized unit of measure, the sale price per square foot of land. The sale price per square foot of land correlates well among the comparable sales and is commonly used by buyers in this type of analysis.

Property Rights

The property rights transferred were believed to be those of the fee simple estate. No differences between the sales and the subject are reflected.

Conditions of Sale

All sales were reportedly market oriented. No adjustment consideration for conditions of sale was necessary.

Financing

We considered any indication of favorable financing. All sales were either on a cash basis or had market-oriented financing, therefore, no differences were noted nor were adjustments made.

Market Conditions

The sales occurred over the period from July 24, 2017 to May 22, 2018. The date of value is July 26, 2019. The market has shown stable market conditions over this time period. No adjustment is warranted.

Location

The subject property is located at East 28th Street in Riviera Beach. Comparables 4 and 5 are located in an inferior area and are adjusted upward.

Size

Generally, larger properties will sell for a somewhat lower price per square foot of land than smaller ones, and vice versa, when all else is equal. The sales in this data set appear to follow this pattern and Comparable 2 is adjusted upward.

Site Conditions

Properties of all different shapes can typically be developed. Some properties, however, allow for a more efficient development of the site providing for the maximum development intensity. Neither the subject nor the comparables appear be impacted by their shape in such a manner as to limit their development. Another factor considered here is the existence of any physically detrimental site conditions such as contamination or muck. Neither the subject nor any of the comparables were known to suffer from any detrimental site conditions.

Zoning/Land Use

The subject property has a zoning designation of DC - Downtown Core by City of Riviera Beach with an underlying future land use of C - Commercial by City of Riviera Beach.

Though they may vary by municipality, all of the comparables have similar commercial and redevelopment-oriented designations that allow for similar uses as the subject. No adjustment is warranted.

QUANTITATIVE SALES ADJUSTMENT CHART - PRICE/LAND ACRES											
Sale Date	Property Address	Land SF	Price/ Land SF	Financing/ Adj. Price/ Land SF	Conditions of Sale/ Adj. Price/ Land SF	Market Conditions/ Adj. Price/ Land SF	Location	Land Size	Zoning/ Land Use	Final Combined Adjustment	Overall Indication

Subj. Jul-19	East 28th Street Riviera Beach	5,868	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A

Conclusion

Considering all of these differences, we developed the preceding quantitative comparison chart listing the sales as they compare to the subject property, based on a price per square foot of land. Not all categories considered are depicted. Those omitted reflect no differences between the sales and the subject property.

The unadjusted range of value indicated by the sales is roughly $6.08 to $11.99 per square foot of land area. The preceding quantitative comparison chart shows the value range for the subject property after adjustment based on a price per square foot of land area to be from $7.60 to $11.09 with a mean of $9.70. Considering all of the salient factors discussed previously and prevailing market conditions, the appraisers feel a conclusion in the middle portion of the indicated range is most appropriate. Given the preceding data and discussions, it is concluded that the market reflects a value per square foot of land area for the subject property of $10.00 per square foot as of July 26, 2019. Total value is calculated as follows:

5,868 Square Feet @ $10.00 per Square Foot =	$58,680
Rounded To:	
MARKET VALUE VIA SALES COMPARISON APPROACH:	**$60,000**
