As staff completed this research task, core items contained within existing AIPP Programs began to emerge. More specifically, these items were: 1) a primary and dedicated program facilitator, 2) a master plan, 3) an art advisory board, and 4) an established funding source(s). Accordingly, this presentation is designed by City staff desires to provide the Council with additional details associated with these four core elements so as to effectuate the details required to create the City's new Art In Public Places Program.

Citywide Goal:

The primary goal of the Art in Public Places Program is to establish guidelines and standards for the integration of arts into both public and private development projects throughout the City of Riviera Beach. This Program will visually enliven the city; illuminate the city's history, diversity and culture; and foster economic development. Using creative schemes and products, results will be achieved through acquiring, exhibiting, and maintaining signature artwork for public consumption throughout public spaces.
