SCOPE OF WORK Interlocal Agreement between the City of Riviera Beach

Overview: Palm Beach County (PBC) provides reentry services through a voluntary program that is data-driven and evidence-based. Reentry services help reintegrate individuals returning from incarceration into the community by creating opportunities that reduce recidivism. PBC is the recipient of funding from the local, state, and federal levels. The two reentry service categories are 1) case management and 2) client support services.

By entering into this Contract, the City of Riviera Beach (RB) agrees that it is a subrecipient of the funds provided to PBC from the Florida state appropriation through the Florida Department of Corrections (FDC), U.S. Department of Justice's Federal Justice Assistance Grant (JAG), and/or the U.S. Department of Justice's State JAG through the Florida Department of Law Enforcement (FDLE). RB is subject to the terms and conditions for receipt of funds imposed by those entities.

Client Eligibility: Eligible reentry clients must be moderate-to-high risk of recidivating based on a validated risk and needs assessment, convicted of a felony offense, sentenced to local jail, state prison, or federal prison, and returning to PBC upon release from incarceration. Eligible reentry clients may include walk-ins, referrals by PBC, referrals by the Palm Beach Sheriff's Office (PBSO), and referrals by other contracted reentry service providers.

Overall Objectives: Reduce recidivism, increase the number of people who successfully complete the reentry program, and increase public safety.

Geographic Areas to Serve: County-wide

Staff Meetings: RB reentry staff are required to meet with PBC reentry staff on a monthly basis, or at the PBC Criminal Justice Program Manager's discretion, to provide program updates and strategize on how to improve PBC's reentry system. RB reentry staff should also be available for other reentry trainings and events, as determined by PBC.

Evidence-Based Programs and Practices: According to the latest available evidence, in order to reduce recidivism, RB must conduct a risk and needs assessment on each reentry client using the Level of Service Inventory-Revised (LSI-R), and then follow the Risk-Need-Responsivity (RNR) model:

- Risk Principle: Match the intensity of individual's intervention to their risk of recidivating, based on a validated risk and needs assessment. Target individuals who have the highest risk of recidivating.
- Need Principle: Target dynamic criminogenic needs.

 Responsivity Principle: Tailor the intervention to the learning style, motivation, culture, demographics, and abilities of the individual. Address the issues that affect responsivity.
