

February 8, 2016

City of Riviera Beach Utility District
600 West Blues Heron Boulevard
Riviera Beach, FL 33404

Thank you for your consideration of Underwater Solutions Inc. for the inspection and cleaning of your water storage facilities.

Please find that Underwater Solutions Inc. is believed to be the only qualified firm by most of our customers due to the specialized nature of completing in-service water storage facility inspections and maintenance, as it is an engineering service that is provided. There are several certifications and qualifications to complete this work such as proper insurances, homeland security requirements, employment verification, state certification, inspection certifications, OSHA Training, NACE certification and most importantly, a list of references pertaining to this specific line of work (attached).

We are a registered Florida Corporation and typically complete many (150-300) water tank inspections within Florida each year, while tanks remain fully in-service, preventing down time.

Once again, I would like to thank you for your consideration of *U_S*

Sincerely,

UNDERWATER SOLUTIONS INC.

David Cornish
Director of Operations
